

and the other two were not present. The first was a small, dark, irregularly shaped mass, which was easily removed by a scalpel. The second was a larger, more rounded, yellowish-white mass, which was more difficult to remove. Both masses were removed intact.

在這裏，我們可以說，這就是我們的「新文化」。

the following table:

1. *Chlorophytum comosum* (L.) Willd.  
2. *Chlorophytum comosum* (L.) Willd.  
3. *Chlorophytum comosum* (L.) Willd.

## 1.3.2.2. The effect of the standard velocity distribution parameter

# 卷之三

John [unclear] - 1900-1901

and the following day he was buried at the cemetery.

and different types of the population have different rates of increase due to different birth and death rates.

and the remaining four will be used to build four additional houses. The total expenditure will be Rs. 1,000/- per house.

The following statement is made by the author of the paper:
